natural beeswax

Beeswax is a natural by-product of honey. Beeswax (*cera alba*) is a natural wax produced by honey bees of the genus *Apis*. Beeswax has been used since prehistoric times for various purposes, from making candles to polishing wood and leather. Beeswax is edible which makes it non-toxic and a great ingredient for body-care products.

Our beeswax is harvested from the *Apis dorsata* bees, as a by-product of our signature range of honey.

fair-trade

The World Fair Trade Organization is a global community of social enterprises that practice fair trade.

WFTO's Guarantee System is the only international verification model focused on social enterprises that put the interests of workers, farmers and artisans first.

Last Forest is certified fair trade.
