natural beeswax

Beeswax is a natural by-product of honey. Beeswax (*cera alba*) is a natural wax produced by honey bees of the genus *Apis*. Beeswax has been used since prehistoric times for various purposes, from making candles to polishing wood and leather. Beeswax is edible which makes it non-toxic and a great ingredient for body-care products.

Our beeswax is harvested from the *Apis dorsata* bees, as a by-product of our signature range of honey.

fair trade

The World Fair Trade Organization is a global community of social enterprises that practice fair trade.

WFTO's Guarantee System is the only international verification model focused on social enterprises that puts the interests of workers, farmers and artisans first.

Last Forest is certified fair trade.

'scrubber' soaps

These handcrafted pure beeswax soaps have been infused with natural flavours and hand-ground powders that add a rough 'scrubbing' effect to the soap. These soaps are great for deep exfoliation of the skin, and each ingredient adds its special benefits for every skin type!

Available in 20g, 50g & 100g bars.

A 'scrubber' soap for every skin type...

amla

to soften skin, best for mature skin.

charcoal

effectively cleanses the skin, unclogs pores and removes dead skin cells.

coffee & cinnamon

exfoliates skin to reduce acne and inflammation, and fight bacteria.

honey & jaggery

scrubs out pimples and acne, especially in oily skin types.
